NEW QUESTION: 1

Company XYZ has received an invoice that includes freight charges. They want to distribute the freight charges proportionately to the same accounts that were charged for the items. Identify the steps they need to follow to create the freight distributions.

- A.** In the Distributions window, click the Allocate button, identify the distribution type as Freight, select Prorate, and select the distributions to which freight charges would be allocated.
- B.** Manually enter freight-type distributions for each account that was charged.
- C.** Enable Automatically Create Freight Distribution in the invoice region in the Payables Options window.
- D.** Create a freight distribution by selecting the Create Freight Distribution check box in the Invoices window.

Answer: A

NEW QUESTION: 2

Your network contains a server named Server1 that runs Windows Server 2012. Server1 has the Hyper-V server role installed.

Server1 hosts four virtual machines named VM1, VM2, VM3, and VM4. Server1 is configured as shown in the following table.

VM3 is used to test Applications.

You need to prevent VM3 from synchronizing its clock to Server1.

What should you configure?

- A.** Single-root I/O virtualization
- B.** resource metering
- C.** Port mirroring
- D.** the VLAN ID
- E.** virtual Machine Chimney
- F.** the startup order
- G.** NUMA topology
- H.** Resource control
- I.** Processor Compatibility
- J.** Integration Services

K. Automatic Start Action

Answer: J

Explanation:

By default when you install the Integration Services/Components you get time synchronization with the host OS, here is how to disable ongoing time synchronization.

When you install the integration services/components in Hyper-V virtual machine you get a set of services installed and enabled by default.

Operating system shutdown Time synchronization Data exchange heartbeat

Backup via VSS If you do not want the virtual machine to continuously synch its time to the Hyper-V host using the integration service, you can disable the integration service from the Hyper-V manager.

Open up the settings for the VM Under Management, highlight the Integration Services option and you will get a list of the Integration Services installed and enabled Uncheck the Time Synchronization service and press Apply.

The virtual machine will now not sync its time with the Hyper-V host on a continuous basis....BUT it will always sync once at power on. This is required to boot strap the timer inside the virtual machine
