All of these will help you to acquire a better knowledge, we are confident that you will through Rayong the Oracle 1Z0-1087-21 certification exam.

NEW QUESTION: 1

You have Active Directory Certificate Services (AD CS) deployed. You create a custom certificate template.

You need to ensure that all of the users in the domain automatically enroll for a certificate based on the custom certificate template.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

A. On the certificate template, assign the Read and Autoenroll permission to the Authenticated Users group.

B. On the certificate template, assign the Read, Enroll, and Autoenroll permission to the Domain Users group.

C. In a Group Policy object (GPO), configure the Automatic Certificate Request Settings.

D. In a Group Policy object (GPO), configure the Autoenrollment settings.

Answer: B,D

Explanation:

To automatically enroll client computers for certificates in a domain environment, you must:

To configure an autoenrollment policy for the domain. (...)

6. In Configuration Model, select Enabled to enable autoenrollment.

To configure certificate templates for autoenrollment. (...)

6. In the Permissions for Authenticated Users list, select Read, Enroll, and Autoenroll in the Allow column, and then click OK and Close to finish

MY NOTE: It says Authenticated Users here, and the answer says Domain Users. However, it is also clear that the Enroll permission is needed in addition to Read and Autoenroll. My only thoughts here is that Authenticated Users is a sort of subset of Domain Users - literally representing only users who have an active ticket/token.
