NEW QUESTION: 1

DRAG DROP

Drag and drop the IPv6 multicast feature on the left to its corresponding function on the right.

Answer:

Explanation:

NEW QUESTION: 2

NAT展開での内部インターフェイス設定に関する説明はどれですか？

A.

アクセスマップまたはルートマップを使用して変換される発信パケットの送信元アドレスの場所を識別します。

B. 静的NATを使用する場合は構成する必要があります

C. トラフィックがインターネットに到達するために使用するパブリックIPアドレスを識別します。

D. グローバルに定義されます

Answer: A

Explanation:

This module describes how to configure Network Address Translation (NAT) for IP address conservation and how to configure inside and outside source addresses. This module also provides information about the benefits of configuring NAT for IP address conservation.

NAT enables private IP internetworks that use nonregistered IP addresses to connect to the Internet. NAT operates on a device, usually connecting two networks, and translates the private (not globally unique) addresses in the internal network into legal addresses before packets are forwarded onto another network. NAT can be configured to advertise to the outside world only

one address for the entire network. This ability provides additional security by effectively hiding the entire internal network behind that one address. NAT is also used at the enterprise edge to allow internal users access to the Internet and to allow Internet access to internal devices such as mail servers.

NEW QUESTION: 3

HOTSPOT

Answer:

Explanation:

NEW QUESTION: 4

The Human Resources department manager informs the Human Resource Specialist that Employee 1, who is Head of Sales, plays a virtual role in the organization and they must plan for the successors of the employee. What should the Human Resource Specialist do?
