NEW QUESTION: 1
Where do you define the Main account information for bank and cash subledger journal account transactions?
A. On the Bank document posting profiles form
B. On the Bank accounts form
C. On the Bank groups form
D. On the Bank transaction groups form
Answer: B

NEW QUESTION: 2
Which three statements are true about an EtherChannel? (Choose three.)
A. LACP can operate in both half duplex and full duplex, if the duplex setting is the same on both ends.
B. An EtherChannel forms between trunks that are using different native VLANs.
C. EtherChannel ports in suspended state can receive BPDUs but cannot send them.
D. PAGP and LACP can be configured on the same switch if the switch is not in the same EtherChannel.
E. Ports with different spanning-tree path costs can form an EtherChannel.
Answer: C,D,E
Explanation:
Answer A: EtherChannel groups running PAgP and LACP can coexist on the same switch or on different switches in the
stack. Individual EtherChannel groups can run either PAgP or LACP, but they cannot interoperate.
Answer B:
EtherChannel Member Port States
Port States Description
bundled The port is part of an EtherChannel and can send and receive BPDUs
and data traffic.
suspended The port is not part of an EtherChannel. The port can receive BPDUs
but cannot send them. Data traffic is blocked.
standalone The port is not bundled in an EtherChannel. The port functions as a
standalone data port. The port can send and receive BPDUs and data
traffic.
Answer E: Ports with different spanning-tree path costs can form an EtherChannel if they are

otherwise compatibly
configured. Setting different spanning-tree path costs does not, by itself, make ports incompatible for the formation of
an EtherChannel.

NEW QUESTION: 3
You administer a Microsoft SQL Server instance that will support several databases.
You need to ensure that every new database created has a data type named postalcode that contains the same attributes.
What should you do?
A. Create a user-defined data type on the master database.
B. Create a user-defined type on the model database.
C. Create a user-defined type on the master database.
D. Create a user-defined data type on the model database.
Answer: D
Explanation:
Explanation
One option is to create SQL Server user defined data types.
One trick with new databases is to create the objects in the model database, so as new databases are created the user defined data types will automatically be available.
