However, you should go through our PEGAPCSA85V1 practice test software multiple times and use PDF dumps as well so you can achieve the desired results, Our website has focused on the study of valid PEGAPCSA85V1 verified key points and created real questions and answers based on the actual test for about 10 years.

No Pass, Full Refund, If you have any questions, our 24/7 customer service is here to answer all your questions, Firstly, download our PEGAPCSA85V1 free pdf for a try now.

If you are one member of the large crowd of candidates who are going to participate in the Pegasystems PEGAPCSA85V1 test, our PEGAPCSA85V1 study materials must be your right destination.

NEW QUESTION: 1

A company has determined through testing that they could improve Rulerunner performance for APT by adding additional threads to Rulerunner. Currently they have a Rulerunner server with 4 cores and 4 threads defined.

How many more threads are recommended to add to the existing Rulerunner server?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

Explanation

In general, you want the number of threads to match the number of processors in the host computer. For example, when Rulerunner is installed on a quad core server, enable four Rulerunner threads.

NEW QUESTION: 2

セキュリティ要件を満たすには、Windows Defender ATPを実装する必要があります。あなたは何をするべきか？

- A. ポートミラーリングを構成する
- B. WindowsDefenderATPOnboardingScript.cmdを実行します
- C. ForceDefenderPassiveModeレジストリ設定を作成します
- D. Microsoft Monitoring Agentをダウンロードしてインストールします

Answer: D

Explanation:

Topic 1, Litware, Inc

Overview

Litware, Inc. is a financial company that has 1,000 users in its main office in Chicago and 100 users in a branch office in San Francisco.

Existing Environment

Internal Network Infrastructure

The network contains a single domain forest. The forest functional level is Windows Server 2016.

Users are subject to sign-in hour restrictions as defined in Active Directory.

The network has the IP address range shown in the following table.

The offices connect by using Multiprotocol Label Switching (MPLS).

The following operating systems are used on the network:

- * Windows Server 2016
- * Windows 10 Enterprise
- * Windows 8.1 Enterprise

The internal network contains the systems shown in the following table.

Litware uses a third-party email system.

Cloud Infrastructure

Litware recently purchased Microsoft 365 subscription licenses for all users.

Microsoft Azure Active Directory (Azure AD) Connect is installed and uses the default authentication settings.

User accounts are not yet synced to Azure AD.

You have the Microsoft 365 users and groups shown in the following table.

Planned Changes

Litware plans to implement the following changes:

- * Migrate the email system to Microsoft Exchange Online
- * Implement Azure AD Privileged Identity Management

Security Requirements

Litware identifies the following security requirements:

- * Create a group named Group2 that will include all the Azure AD user accounts. Group2 will be used to provide limited access to Windows Analytics
- * Create a group named Group3 that will be used to apply Azure Information Protection policies to pilot users. Group3 must only contain user accounts
- * Use Azure Advanced Threat Protection (ATP) to detect any security threats that target the forest
- * Prevent users locked out of Active Directory from signing in to Azure AD and Active Directory
- * Implement a permanent eligible assignment of the Compliance administrator role for User1
- * Integrate Windows Defender and Windows Defender ATP on domain-joined servers
- * Prevent access to Azure resources for the guest user accounts by default
- * Ensure that all domain-joined computers are registered to Azure AD

Multi-factor authentication (MFA) Requirements

Security features of Microsoft Office 365 and Azure will be tested by using pilot Azure user accounts.

You identify the following requirements for testing MFA.

- * Pilot users must use MFA unless they are signing in from the internal network of the Chicago office.

MFA must NOT be used on the Chicago office internal network.

- * If an authentication attempt is suspicious, MFA must be used, regardless of the user location
 - * Any disruption of legitimate authentication attempts must be minimized
- General Requirements Litware wants to minimize the deployment of additional servers and services in

the Active Directory forest.

NEW QUESTION: 3

- A. Option D
 - B. Option B
 - C. Option A
 - D. Option C
- Answer: C**

NEW QUESTION: 4

Which two types of Cisco Unified Communications Manager trace files contain Call Processing information that is helpful for troubleshooting outbound and inbound calling issues? (Choose two.)

- A. Cisco Unified Communications Manager SDI trace
