### NEW QUESTION: 1

An application accessing your database got the following error in response to SQL query:

ORA-12827: insufficient parallel query slaves available

View the parallel parameters for your instance:

No hints are used and the session use default parallel settings.

What four changes could you make to help avoid the error and ensure that the query executes in parallel?

- A. Increase PARELLEL\_SERVERS\_TARGET.
- B. Decrease PARELLEL\_MIN\_TIME\_THRESHOLD.
- C. Decrease PARELLEL\_MIN\_PERCENT.
- D. Increase the value of PARELLEL\_MAX\_SERVERS.
- E. Increase PARELLEL\_\_MIN\_TIME\_THRESHOLD.
- F. Increase PARELLEL\_MIN\_SERVERS.
- G. Set PARELLEL\_DEGREE\_POLICY to AUTO.

**Answer: A,C,E,G**

Explanation:

C: PARALLEL\_SERVERS\_TARGET specifies the number of parallel server processes allowed to run parallel statements before statement queuing will be used. When the parameter PARALLEL\_DEGREE\_POLICY is set to AUTO, Oracle will queue SQL statements that require parallel execution, if the necessary parallel server processes are not available. Statement queuing will begin once the number of parallel server processes active on the system is equal to or greater than PARALLEL\_SERVER\_TARGET.

By default, PARALLEL\_SERVER\_TARGET is set lower than the maximum number of parallel server processes allowed on the system (PARALLEL\_MAX\_SERVERS) to ensure each parallel statement will get all of the parallel server resources required and to prevent overloading the system with parallel server processes.

D: Note: ORA-12827: insufficient parallel query slaves available Cause:

PARALLEL\_MIN\_PERCENT parameter was specified and fewer than minimum slaves were acquired Action: either re-execute query with lower PARALLEL\_MIN\_PERCENT or wait until some running queries are completed, thus freeing up slaves

A, G: PARALLEL\_MIN\_TIME\_THRESHOLD specifies the minimum execution time a statement should have before the statement is considered for automatic degree of parallelism. By default, this is set to 30 seconds. Automatic degree of parallelism is only enabled if PARALLEL\_DEGREE\_POLICY is set to AUTO or LIMITED.
