### NEW QUESTION: 2

Which of the following is a not a preventative control?

- A. Deny programmer access to production data.
- B. Require change requests to include information about dates, descriptions, cost analysis and anticipated effects.
- C. Establish procedures for emergency changes.
- D. Run a source comparison program between control and current source periodically.

**Answer: D**

Explanation:

Running the source comparison program between control and current source periodically allows detection, not prevention, of unauthorized changes in the production environment. Other options are preventive controls.
