NEW QUESTION: 1

HOTSPOT

Your company has two main offices. One office is located in Atlanta and the other office is located in Washington. The offices connect to each other by using a dedicated WAN link. You have an Exchange Server 2013 organization that contains four servers. The servers are configured as shown in the following table.

The company opens a new office in New York. The New York office connects directly to the Washington office via a dedicated WAN link.

You configure a separate Active Directory site for each office.

You discover poor response times when scheduling meetings and configuring Microsoft Outlook profiles from the client computers in the New York office.

You need to reduce the amount of time required to schedule meetings and to configure Outlook profiles from the computers in the New York office.

What command should you run? (To answer, select the appropriate options in the answer area.) Hot Area:

Answer:

Explanation:

Explanation/Reference:

Explanation:

The AutoDiscoverSiteScope parameter specifies the site for which the Autodiscover service is authoritative. Clients that connect to the Autodiscover service by using the internal URL must belong to a listed site.
