NEW QUESTION: 1

You are the project manager for your company and a new change request has been approved for your project. This change request, however, has introduced several new risks to the project. You have communicated these risk events and the project stakeholders understand the possible effects these risks could have on your project. You elect to create a mitigation response for the identified risk events. Where will you record the mitigation response?

- A. Project management plan
- B. Risk management plan
- C. Risk log
- D. Risk register

Answer: D

Explanation:

Explanation/Reference:

Explanation:

The Identified risks and potential responses are documented in the risk register. A risk register is an inventory of risks and exposure associated with those risks. Risks are commonly found in project management practices, and provide information to identify, analyze, and manage risks. Typically a risk register contains:

A description of the risk

The impact should this event actually occur

The probability of its occurrence

Risk Score (the multiplication of Probability and Impact)

A summary of the planned response should the event occur

A summary of the mitigation (the actions taken in advance to reduce the probability and/or impact of the

event)

Ranking of risks by Risk Score so as to highlight the highest priority risks to all involved.

Incorrect Answers:

B: This is not a valid choice for this question

C: The project management plan is the parent of the risk management plan, but the best choice is the risk register.

D: The risk management plan is an input to the risk response planning, but it is not the best choice for this question

NEW QUESTION: 2

You are currently using VLAN IDs 2 through 300 within your Layer 2 domain and you need to configure VSTP to prevent loops. You must ensure that all VLANs are loop free.

In this scenario, which statement is correct?

A. You must enable RSTP to account for all VLANs.

B. You must ensure that the bridge priority is set to the lowest value on all switches in the Layer 2 domain.

C. You must ensure that the VLANs are balanced between two different root bridges.

D. You must enable all VLANs, 2 through 300, under the VSTP configuration

Answer: D

NEW QUESTION: 3

Why do you configure a standby host?

A. To share storage between several active data centers

B. To ensure high performance during replication and reading processes

C. To add more capacity disk storage

D. To reduce recovery time from an outage

Answer: D
