NEW QUESTION: 1

Which change in the security processes is introduced by cloud computing?

- A. Regulations need to be updated more frequently
- B. Storing passwords in the Configuration Management Database (CMDB)
- C. Working with multiple providers of user identities
- D. Increased security of accessing credit card information

Answer: C

NEW QUESTION: 2

Touch points in a store refers to

- A. Areas where employees can be briefed by the manager
- B. The store godown where stock movement is recorded
- C. The store scheduling process
- D. Areas where customers interact with store employees and systems

Answer: D

NEW QUESTION: 3

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2012 and has the DHCP Server server role installed.

Server1 has a scope named Scope1. A policy named Policy1 is configured for Scope1. Policy1 is configured to provide Hyper-V virtual machines a one-day lease. All other computers receive an eight-day lease.

You implement an additional DHCP server named Server2 that runs Windows Server 2012.

On Server1, you configure Scope1 for DHCP failover.

You discover that virtual machines that receive IP addresses from Server2 have a lease duration of eight days.

You need to ensure that when Server2 assigns IP addresses to the Hyper-V virtual machines, the lease duration is one day. The solution must ensure that other computers that receive IP addresses from Server2 have a lease duration of eight days.

What should you do?

- A. On Server1, right-click Scope1, and then click Replicate Scope.
- B. On Server2, right-click Scope1, and then click Reconcile.
- C. On Server2, create a new DHCP policy.
- D. On Server1, delete Policy1, and then recreate the policy.

Answer: A

Explanation:

Scope 1 has been set up for DHCP failover. Now we need to replicate it from Server1 to Server2.
