Sometime I even don't want to explain too much, Professional **Best CHRM-001 Practice.pdf** handles professional affairs, 7*24*365 Customer Service & Pass Guarantee & Money Back Guarantee.

NEW QUESTION: 1

Business Impact Analysis (BIA) is about:

- A. Supporting the mission of the organization
- B. Technology
- C. Risk Assessment
- D. Due Care

Answer: A

Explanation:

Explanation/Reference:

Explanation:

A Business Impact Assessment (BIA) supports the mission of the organization by identifying the resources that are critical to an organization's ongoing viability and the threats posed to those resources. The BIA also assesses the likelihood that each threat will actually occur and the impact those occurrences will have on the business.

Incorrect Answers:

A: BIA is about critical business functions, and about technology.

C: While due care concerns using reasonable care to protect the interests of an organization, BIA is about supporting the mission of the organization.

D: BIA is about risk assessment. A BIA often takes place prior to a risk assessment. The BIA focuses on the effects or consequences of the interruption to critical business functions and attempts to quantify the financial and non-financial costs associated with a disaster. The business impact assessment looks at the parts of the organization that are most crucial.

NEW QUESTION: 2

A technician is troubleshooting a BSOD and suspects the crash is being caused by a faulty motherboard.

In which of the following can the technician check the cause? (Select TWO).

- A. Performance Monitor
- B. Device Manager
- C. Event Viewer
- D. System Control panel
- E. % SystemRoot%Memory.DMP

Answer: C,E

NEW QUESTION: 3

Which of the following is a security risk regarding the use of public P2P as a method of collaboration?

- A. Users are not responsible for data usage tracking.
- B. Limiting the amount of necessary space for data storage.
- C. Data integrity is susceptible to being compromised.
- D. Monitoring data changes induces a higher cost.

Answer: C

Explanation:

Peer-to-peer (P2P) networking is commonly used to share files such as movies and music, but you must not allow users to bring in devices and create their own little networks. All networking must be done through administrators and not on a P2P basis. Data integrity can easily be compromised when using public P2P networking.

Incorrect Answers:

- B. Data changes occur whether using P2P or any other type of networking where data files are concerned.
- C. Users are not responsible for this task, rather the security administrators are.
- D. Limiting storage space is not a security risk when making use of public P2P collaboration.
