NEW QUESTION: 4

Which of the following can be used as a covert channel?

A. Storage and permissions.

B. Storage and low bits.

C. Storage and timing.

D. Storage and classification.

Answer: C

Explanation:

Those are the proper elements, you can use these two to achieve a covert channel. Low bits is not a term related to covert channels. Permissions are related to authentication, they do not achieve what the question wants. Also, classification is could not selected as a correct choice.

Check your official CISSP documentation to see what can be used as a covert channel.

"An active variation on eavesdropping is called Covert Channel eavesdropping, which consists of using a hidden unauthorized network connection to communicate unauthorized information. A Covert Storage Channel operates by writing information to storage by one process and then reading by using another process from a different security level. A Covert Timing Channel signals information to another process by modulating its own resource use to affect the response time of another." Pg. 101 Krutz: The CISSP Prep Guide: Gold Edition
