### NEW QUESTION: 3

You need to update an OS image on a client. The `pkg publishers` command displays the wrong publisher with the wrong update:

PUBLISHERTYPESTATUSURI

Solaris origin online `http://pkg.oracle.com/solaris/release`

The update is available on the updated publisher:

PUBLISHERTYPESTATUSURI

Solaris origin online `http://sysA.example.com`

Select the option that describes the procedure used to update the OS image on the system from the updated publisher.

**A.** Add the new publisher `http://sysA.example.com` Solaris Use the `pkg set-publisher` command to set the publisher search order and place `http://sysA.example.com` of `http://pkg.oracle.com/solaris/release` issue the `pkg publisher` command to view the publishers. Set the new publisher to sticky. Issue the `pkg update` command to update the OS image.

**B.** Configure the publisher on the client using the `svcfg - s` command so that the Solaris publisher is connected to the repository at `http://sysA.example.com` Refresh the application/pkg/server service. Issue the `pkgrepo refresh` command to repository catalog

**C.** Use the `pkg set-publisher` command to change the URL of the publisher Solaris to `http://sysA.example.com`. Issue the `pkg update` command to update the OS image.

**D.** Copy the repository from the ISO image onto the local client. Configure the repository on the client by using the `svccfg - s` command so that the Solaris publisher is connected to the new repository. Refresh the application/pkg/server service. Issue the `pkgrepo refresh` command to refresh the repository catalog

**Answer: C**

Explanation:

Explanation/Reference:

Explanation:

You can use the `pkg set-publisher` command to change a publisher URI.

Changing a Publisher Origin URI

To change the origin URI for a publisher, add the new URI and remove the old URI. Use the `-g` option to add a new origin URI. Use the `-G` option to remove the old origin URI.

```
# pkg set-publisher -g http://pkg.example.com/support
```

```
-G http://pkg.example.com/release example.com
```

Note: You can use either the `install` or `update` subcommand to update a package.

The `install` subcommand installs the package if the package is not already installed in the image. If you want to be sure to update only packages that are already installed, and not install any new packages, then use the `update` subcommand.

#### NEW QUESTION: 4

If more than one candidate record is found for a person, what should the Recruiting Center users do before starting an On boarding (Transitions) process? (Choose the best answer.)

**A.** Perform the Merge Candidate Files action.

**B.** Change the status of the candidate record that you want to use to prehire.

**C.** No action is necessary; the system identifies duplicate records and uses the most recently created one for the Onboarding process.

**D.** Delete the candidate record in SmartOrg.

**E.** Create a new candidate record in SmartOrg for the On boarding process.

**Answer: A**
