NEW QUESTION: 3

Answer:

Explanation:

Topic 4, Litware

Case study

Exchange Server

Litware has an Exchange Server 2016 organization that uses the namespaces of mail.litware.com and autodiscover.litware.com.

The organization contains the servers configured as shown in the following table.

All Internet email is routed through HOU-EX1.

Requirements

Business Goals

Litware has security concerns about the data and messaging content of the research and development department. Preventing information leaks is a priority.

All users must be able to access their corporate email from any device.

Litware plans to minimize the costs associated with changing the Exchange Server environment.

Planned Changes

Litware plans to implement a site resilience solution ensuring that outbound email messages can be delivered if one of the sites fail. The site resilience solution must allow all users to access their mailbox if a server fails in each site.

Availability Requirements

Litware identifies the following availability requirements:

Load balancing must support the following functionalities:

* Load balancing must support the following functionalities:

* * * Provide SSL termination

* Remove failed Mailbox servers from the server pool.

* Data collected by Managed Availability from Outlook on the web must be used.

* Target server health must be configured as per-protocol so that only the affected client protocol is directed to another server if a server fails.

* The site resilience solution must follow the bound namespace model.

Security Requirements

Litware identifies the following security requirements:

* Users in the research and development department must be able to encrypt documents sent to external users. The encrypted email messages must never be forwarded by the external recipients.

* Only specific research and development department users must be able to access confidential internal email regarding the high-security government contracts.

* All certificates deployed to the Exchange organization must be issued by a trusted third-party certification authority (CA).

* The principle of least privilege must be applied to all users and permissions.

Compliance Requirements

Litware identifies the following compliance requirements:

* Any new mailbox created for the auditing department must have a retention policy named Audit immediately applied manually after the mailbox is created.

* Each week, a team of regulation auditors must review the email messages sent and received by all the research and development department users.

* The regulation auditors must be able to review the email messages of mailboxes placed on Litigation Hold.

* The regulation auditors must be able to gain quick access to the email messages.
