NEW QUESTION: 1

DRAG DROP

Every Sunday afternoon, a process inserts a large volume of data. Users generate reports and modify additional data throughout the week.

You need to create a backup strategy that:

- *minimizes the size of the transaction log.
- *minimizes the size of the backups, and
- *ensures a 24-hour recovery point objective (RPO)

Which Strategy or strategies should you use?

Answer:

Explanation:

NEW QUESTION: 2

An IS steering committee should:

- A.** ensure that IS security policies and procedures have been executed properly.
- B.** include a mix of members from different departments and staff levels.
- C.** be briefed about new trends and products at each meeting by a vendor.
- D.** have formal terms of reference and maintain minutes of its meetings.

Answer: D

Explanation:

It is important to keep detailed steering committee minutes to document the decisions and activities of the IS steering committee, and the board of directors should be informed about those decisions on a timely basis. Choice A is incorrect because only senior management or high-level staff members should be on this committee because of its strategic mission. Choice B is not a responsibility of this committee, but the responsibility of the security administrator. Choice D is incorrect because a vendor should be invited to meetings only when appropriate.

NEW QUESTION: 3

When adding a new layer to ArcMap, an ArcGIS user gets a Geographic Coordinate System Warning dialog box.

What should the user do to resolve this issue?

- A.** Project the layer to match the geographic coordinate system of all other layers in the data

frame

B. Set a geographic transformation in the data frame properties

C. Define the coordinate system of the layer to match the coordinate system of the data frame

D. Check the Don't Warn Me Again check box on the dialog box

Answer: C

NEW QUESTION: 4

Which of the following statements about redundant Direct Connect connections is false?

A. When one connection breaks down, the system automatically switches to the other one

B. Redundant connections are efficient against connections faults, ensuring service continuity

C. For redundant connections, you must manually set which is active and which is standby

D. When two connections are terminated at different locations in the same region, the two connections work as backups for each other

Answer: B
