Highest ratio of success, Are you looking for HPE2-W07 exam study material with the help of which you can pass exam in your first attempt, HPE2-W07 is the authentic study guides with the latest exam material which can help you solve all the difficulties in the actual test.

So the clients can trust our HPE2-W07 exam materials without doubt.

NEW QUESTION: 1

- A. JQuery.js
- B. SDK.REST.js
- C. json2.js
- D. Prototype.js

Answer: A

NEW QUESTION: 2

You have been asked to leverage Amazon VPC BC2 and SOS to implement an application that submits and receives millions of messages per second to a message queue.

You want to ensure your application has sufficient bandwidth between your EC2 instances and SQS Which option will provide the most scalable solution for communicating between the application and SOS?

- A. Launch application instances in private subnets with an Auto Scaling group and Auto Scaling triggers configured to watch the SOS queue size
- B. Ensure the application instances are properly configured with an Elastic Load Balancer
- C. Ensure the application instances are launched in private subnets with the EBS-optimized option enabled
- D. Ensure the application instances are launched in public subnets with the associate-public-IP- address=true option enabled

Answer: A

Explanation:

Bandwidth literally means network not IO Bandwidth. Having alerts to scale the Autoscaling is most sophisticated option.

NEW QUESTION: 3

You administer a Microsoft SQL Server 2012 database.

You provide temporary securityadmin access to User1 to the database server.

You need to know if User1 adds logins to securityadmin.

Which server-level audit action group should you use?

- A. SERVER_ROLE_MEMBER_CHANGE_GROUP
- B. SERVER_STATE_CHANGE_GROUP

C. SUCCESSFUL_LOGIN_GROUP

D. SERVER_PRINCIPAL_IMPERSONATION_GROUP

Answer: A

Explanation:

Explanation/Reference:

Reference:

<http://technet.microsoft.com/en-us/library/cc280663.aspx>

SERVER_STATE_CHANGE_GROUP

This event is raised when the SQL Server service state is modified. Equivalent to the Audit Server Starts and Stops Event Class.

SERVER_PRINCIPAL_IMPERSONATION_GROUP

This event is raised when there is an impersonation within server scope, such as EXECUTE AS <login>.

Equivalent to the Audit Server Principal Impersonation Event Class.

SUCCESSFUL_LOGIN_GROUP Indicates that a principal has successfully logged in to SQL Server.

Events in this class are raised by new connections or by connections that are reused from a connection pool. Equivalent to the Audit Login Event Class.

SERVER_ROLE_MEMBER_CHANGE_GROUP

This event is raised whenever a login is added or removed from a fixed server role. This event is raised for the sp_addsrvrolemember and sp_dropsvrolemember stored procedures.

Equivalent to the Audit Add Login to Server Role Event Class.

NEW QUESTION: 4

SIMULATION

Click to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar.

When you are finished performing all the tasks, click the 'Next' button.

Note that you cannot return to the lab once you click the 'Next' button. Scoring occurs in the background while you complete the rest of the exam.

Overview

The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

To start the lab

You may start the lab by clicking the Next button.

You plan to connect several virtual machines to the VNET01-USEA2 virtual network.

In the Web-RGlod8322489 resource group, you need to create a virtual machine that uses the Standard_B2ms size named Web01 that runs Windows Server 2016. Web01 must be added to an availability set.

What should you do from the Azure portal?

Answer:

Explanation:

See explanation below.

Explanation

Step 1. Choose Create a resource in the upper left-hand corner of the Azure portal.

Step 2. In the Basics tab, under Project details, make sure the correct subscription is selected and then choose Web-RGlod8095859 resource group

Step 3. Under Instance details type/select:

Virtual machine name: Web01

Image: Windows Server 2016

Size: Standard_B2ms size

Leave the other defaults.

Step 4. Finish the Wizard
