We hereby guarantee that No Pass No Pay, In fact, it is not easy to pass the JN0-1332 actual exam even to get high scores, So, if you think the questions from the demo is just what you are looking for, you will satisfied to purchase our dumps, while, the questions of the JN0-1332 dump demo is just part of the complete dumps, so it can be just as a reference.

NEW QUESTION: 1

- A. Option D
- B. Option B
- C. Option C
- D. Option A

Answer: A

NEW QUESTION: 2

The GRC Business owner responsible for reviewing and investigating access incidents related to the "Order to Cash" perspective does not see any worklists for the generated results. You have validated that:

1. Other business owners are able to view their assigned worklists without any problem
 2. Incidents have been generated for the controls related to Order to Cash
 3. The business owner's assigned roles contain the correct functional privileges and data access to the correct perspective values
- What is the reason the business owner cannot see any worklists for the generated incidents?
- A. The underlying model is not linked to Order to Cash.
 - B. The business owner was recently assigned the role and the worklist needs to be refreshed.
 - C. Worklist assignment does not include the business owner.
 - D. The Result Management Perspective Assignment has not been linked.
 - E. The Control Perspectives are not linked to the control.

Answer: C

NEW QUESTION: 3

Which of the following represents the total cash flows of an investment, over a period of time, adjusted to reflect the time value of money?

- A. The Net Present Value.
- B. The Internal Rate of Return.
- C. The Time to Payback.
- D. The Return on Investment.

Answer: A

NEW QUESTION: 4

Click the Exhibit button.

Referring to the exhibit, which two statements are true? (Choose two.)

- A. A derived quota is set on qtree1, and an explicit quota is set on qtree2.
- B. A default tree quota is set on volume svm1_data1.
- C. A default user quota is set on volume svm1_data1.
- D. An explicit quota is set on qtree1, and a derived quota is set on qtree2.

Answer: C,D

Explanation:

A quota enforced as a result of a default quota, rather than an explicit quota (a quota with a specific target), is referred to as a derived quota. To see derived quotas, you can generate a quota report. In the report, a derived user or group quota is indicated by a Quota Specifier that is either blank or an asterisk (*). A derived tree quota, however, has a Quota Specifier; to identify a derived tree quota, you must look for a default tree quota on the volume with the same limits. Since they are not manually configured quota rules, derived quotas do not appear in the output of the quota policy rule show command.
