NEW QUESTION: 3
Which of the following is a container for metrics in Cloudwatch?

A. Packages
B. MetricCollection
C. Locale
D. Namespaces
Answer: D
Explanation:
Explanation
The AWS Documentation mentions the following
Cloud Watch namespaces are containers for metrics. Metrics in different namespaces are isolated from each
other, so that metrics from different applications are
not mistakenly aggregated into the same statistics. All AWS services that provide Amazon Cloud Watch data
use a namespace string, beginning with "AWS/". When
you create custom metrics, you must also specify a namespace as a container for custom metrics. The
following services push metric data points to Cloud Watch.
For more information on Cloudwatch namespaces, please visit the below URL:
