NEW QUESTION: 2

On which level is encryption implemented in the StoreServ array?

- A. The record pair level
- B. The Commware Provisioning Group level
- C. The physical disk level
- D. The Virtual Volume level

Answer: C

Explanation:

Explanation

Once data is received at the disk level the disk will act upon this data as a normal data request. The drive electronics are responsible for checking and maintaining data integrity prior to data entering the data encryption engine. We will not discuss in this paper these checks other than to make reference to the checks being performed.
