NEW QUESTION: 1
You are developing an online order website that uses Azure Durable Functions- You develop the following processes for the website:

You need to identity what types of functions to use for each step of the process.
Which function types should you use? To answer, drag the appropriate function types to the correct operations.
Each function type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.
You need to identify what types of functions to use for each step of the process.
Which function types should you use? To answer, drag the appropriate function types to the correct operations.
Each function type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:
Explanation:

NEW QUESTION: 2
Your customer has asked you to come in and verify the operation of routers R1 and R2 which are configured to use HSRP. They have questions about how these two devices will perform in the event of a device failure.

Refer to the exhibit. If router R1 interface Etherne0/0 goes down and recovers, which of the statement regarding HSRP priority is true?
A. The interface will have the priority decremented by 40 for HSRP group 1.
B. The interface will have its current priority incremented by 40 for HSRP group 1.
C. The interface will have its current priority incremented by 60 for HSRP group 1.
D. The interface will have the priority decremented by 60 for HSRP group 1.
E. The interface will default to the a priority of 100 for HSRP group 1.

Answer: B

NEW QUESTION: 3
You need to recommend a storage solution for a sales system that will receive thousands of small files per minute. The files will be in JSON, text, and CSV formats. The files will be processed and transformed before they are loaded into an Azure data warehouse. The files must be stored and secured in folders.
Which storage solution should you recommend?
A. Azure Data Lake Storage Gen2
B. Azure Blob storage
C. Azure SQL Database
D. Azure Cosmos DB
Answer: A
Explanation:
Azure provides several solutions for working with CSV and JSON files, depending on your needs. The primary landing place for these files is either Azure Storage or Azure Data Lake Store.1 Azure Data Lake Storage is an optimized storage for big data analytics workloads.
Incorrect Answers:
D: Azure Blob Storage containers is a general purpose object store for a wide variety of storage scenarios.
Blobs are stored in containers, which are similar to folders.
